production ”

“T.S.R. is your only single source for your wire harness equipment needs.”

www.tsr-mi.com

Quality terminal applicators, Bench presses, Stripper crimper attachments & prototype molding machines.

High quality braiding machines and braiding equipment for automotive, aerospace, medical and engineering companies.

Breyden Products, Inc. is a leading manufacturer of lacing tapes and cords used in the electric motor and aerospace industries. We provide innovative application solutions and engineering expertise of fibers, finishes and processing techniques. Specializing in wire harnessing tapes, twines & nomex braiding yarns

Electrical and pneumatic benchtop wire stripping machines for hook up wires, multiconductor wires and large wires.

Heat guns using state of the art technology to maximize precision and durability.

Ferrules, ferrule crimpers and ferrule crimper/strippers.

Focus Lite line of heat shrink processing machines.

Heat shrink tubing cutters, heat shrink ovens, convoluted tubing cutters, flat ribbon cutters & marking and cutting machines.

"T.S.R. is your only single source for your wire harness equipment needs."

Mechanical and digital pull testers, stands and accessories.

LG Cable's product line of economical heat shrinkable tubing.

PRECISION
TECHNOLOGY

Manufacturer of quality wire harness test board accessories. Wire routers, gated routers, gated routers for mesh, gated routers with stands, housing holders, mechanisms and routing posts.

Economical, full featured crimp force monitors

Used wire processing equipment, spare parts, blades for all manufacturers & belts. Check our website for current product availability.
